Veřejný klíč (TXT request), nazývaný Certificate Signing Request (CSR), je generovaný na serveru, kde je hostovaná (umístěná) Vaše doména na které bude SSL certifikát funkční. Tento TXT request Vám vygeneruje Váš administrátor serveru nebo poskytovatel webhostingu.

Jak se veřejný klíč generuje, zjistíte dle používaného web serveru na stránkách <http://www.geotrust.com/support/generate-csr/>

Pro vygenerování veřejného klíče je nutné znát následující informace:

	Popis	Příklad
Common Name (CN)	Přesný název domény	www.zoner.cz
Organization Name	Jméno firmy	ZONER software, a.s.
Organizational unit	Jednotka, účel	Internet
Country Code	Kód země	CZ
State or Province	Stát	Czech republic
Locality	Město, část země	Brno
Key Size	Bitová hloubka	2048 bit

Phone Authentication

Before your order can be placed, we will call you to verify your contact phone number. An automated application will call you and you will be required to enter the 4-digit code we display to you. We will also collect a voice recording of your name at that time. Your order will be submitted immediately after successful completion of this automated phone number verification process. PLEASE NOTE: phone authentication will only work with numbers that may be dialed directly. Phone authentication will not work with numbers where an extension needs to be dialed.

We have sent the Order Site Administrator an email with a special link that can be used to perform the Phone Authentication for this order at a later time, or from a different browser; however, we highly recommend you complete this process at this time.

If you are in the US, you would select United States in the country field, and then enter your area code and 7-digit number like this: (555)-123-4567. If you are in the UK, you would select "United Kingdom" in the country field, then enter the city and local numbers like this: (181) 555-5555, etc. This number must be available for direct dial.

Please enter the phone number where you can receive a phone call. The next page will have additional information regarding this process before the call is placed.

Country Code: CZECH REPUBLIC (+420)

Phone Number: 736510016

Do you need to disconnect?

If you are using your phone line for ordering this certificate and do not have a way to receive a phone call, then you must select Disconnect = Yes. This allows you to disconnect from the internet, receive the phone call, then resume your connection.

Yes
 No

If you need to disconnect, please enter the delay (in seconds). Note: If the call is placed too quickly the line will be busy and the call will fail.

Delay in Seconds:

Please select the language you would like the phone authentication system to use when it calls you.

Details of the Phone Authentication process

Once you press the "Place Call Now" button, the automated Phone system will place the call. When the phone rings, you must say something to activate the automated telephone system. The system responds with:

Hello. This is your requested automated telephone call. If you are expecting this call press #, otherwise please hang up.

Once the # key is pressed, the phone system responds with:

Please enter the confirmation number displayed on your computer screen using your telephone keypad, then press #.

At this point, you will enter the Confirmation code displayed on the next screen and then press the # key on your telephone keypad. The phone system responds with:

For security purposes, we will now take a voice recording. After the tone, please state your full name, then press #.

Please speak clearly into the phone and say your name. Once you speak your name and press the # key, the system confirms your successful authentication and responds with:

Congratulations, you have completed the telephone registration process. Please see your computer screen for more information. Goodbye.

You may now hang up the phone.

16. Obdržení vygenerovaného SSL certifikátu a jeho instalace

Na Vámi zvolenou emailovou schránku technického kontaktu bude během cca. 10 minut zaslán vygenerovaný certifikát včetně intermediate certifikátu.

Přesný postup jak certifikát nainstalovat najdete v následujících krocích:

1) Instalace certifikátu:

Dle Vámi používaného webového systému si zobrazte přesný návod pro instalaci certifikátu na stránkách:

https://knowledge.geotrust.com/support/knowledge-base/index?page=content&id=SO15065&actp=search&viewlocale=en_US&actp=GETTING_STARTED

2) Instalace intermediate certifikátu:

Z důvodu update GeoTrust Primary Root na 2048-bit je nutné pro správnou funkčnost instalovat i intermediate certifikát.

V našem případě bude testovací SSL funkční na <https://www.testwebu.com> i <https://testwebu.com>.

17. Funkční SSL certifikát na Vašich stránkách

V našem případě po zvolení adresy <https://www.testwebu.com> je na stránce již SSL certifikát plně funkční po dobu 30 dní. Podrobnosti o certifikátu si v prohlížeči zobrazíte kliknutím na symbol zámečku.

The screenshot shows the TestWebu.com website. At the top, there is a "Security report" tab. The main content area is titled "TestWebu.com" and features the CZECHIA logo. Below the header, there is a welcome message and information about the Zoner software a.s. domain. The website lists several hosting programs under the heading "Nejpoužívanější hostingové programy".
